# Mallorca

## A SEA OF POSSIBILITIES

Mallorca's 550 km of coastline make this island a unique place for marine tourism, a place where you can enjoy a privileged environment, dropping anchor in one of its coves, or do the most extreme sports. Mallorca has also become a strategic location for boat repairs and maintenance, as it's one of the most famous yachting destinations in the world.

## LOCATION, WEATHER AND FACILITIES: EVERYTHING IS JUST RIGHT

---

The island's location in the Mediterranean Sea, with ideal sailing conditions and extensive and technologically-advanced infrastructure, make it perfect for sailing for both sport and leisure. Even on days when there's little wind, there's always the "embat", the breeze that circulates between the sea and land due to the change in temperature between the two surfaces, enabling people to go sailing and providing a refreshing breeze for those enjoying the fine sandy beaches and rocky coves. The water temperature is never extreme, averaging around 14 degrees Celsius in the coldest months (January/February) and 26 degrees Celsius in the hottest months (July/August). As a result, Mallorca offers the chance to do all types of sailing activities at any time of year.

## SUSTAINABILITY

---

The Mediterranean Sea is a source of life, culture, wealth and wellbeing for Mallorca. That's why it's so important to preserve it and make tourist, professional and recreational activities compatible with looking after an exceptional sea. Therefore, local administrations have promoted measures to protect our coastline, our marine environments and, most especially, the Posidonia meadows that provide so much life in this "mare nostrum". These meadows contribute to the cleanliness of the water, supplying oxygen, promoting life and giving it its exceptional clarity, one of our most famous characteristics.

To do this, in addition to the 6 marine reserves covering 35,000 ha on the island, a number of exclusion zones have been established where it is forbidden to drop anchor in order to avoid the damage caused by anchors dragging through and being pulled out of the Posidonia. In these areas, sailors must use the buoys provided, which allow them to stop their boats from drifting away without the need for an anchor.

Other factors contributing to the good health and image of our beloved Mediterranean Sea are the waste management programmes of sports clubs, cargo and fishing ports, wastewater treatment, maritime cleaning services, monitoring and control of any spills and the regulations for eliminating single-use plastics.

## SPORTS AND EVENTS

---

The Copa del Rey de Vela, Trofeo SAR Princesa Sofia and Superyacht Cup Palma are just some of the numerous high-level sporting competitions held annually on Mallorca's regatta courses, with sailing as the star of the show.

These and other nautical events complete an extensive and varied calendar of sports events offered by the island throughout the year.

## ALWAYS THE PERFECT PLACE

---

The unique orography of the island means that we can not only choose the type of place we want to go to depending on the activity (sandy beaches, rocky coves, trips between lighthouses) but also the place itself based on the wind speed and direction. So, we can choose to go upwind or downwind from Dragonera to Formentor, Formentor to Capdepera, Capdepera to Salinas, Salinas to Cabo Blanco, Cabo Blanco to Cala Figuera and Cala Figuera to Dragonera, completing the circle, with places that are always sheltered in case of strong winds, if we're looking for calm waters for diving, swimming, fishing, canoeing or motor sailing; or the opposite if we want to cruise at speeds of more than 20 knots or jump over the waves, among the many sailing activities we can do.

Mallorca's coastguard services, beacons along the coastline, lighthouses in the main coves and islets, lifeguards on the busiest beaches and warning flags are just some of the measures contributing to the excellent maritime safety around the island. However, in order to fully enjoy any sailing or water activity, it's imperative to respect the sea, taking precautions and evaluating risks at all times, following rules and instructions, using the right equipment, doing the right physical preparation and monitoring weather forecasts.

## INFRASTRUCTURE AND SERVICES

---

Majorca has more than 35 marinas along its coastline for sheltering and mooring boats of all sizes. Every single one of them respects environmental regulations and is strongly committed to sustainability.

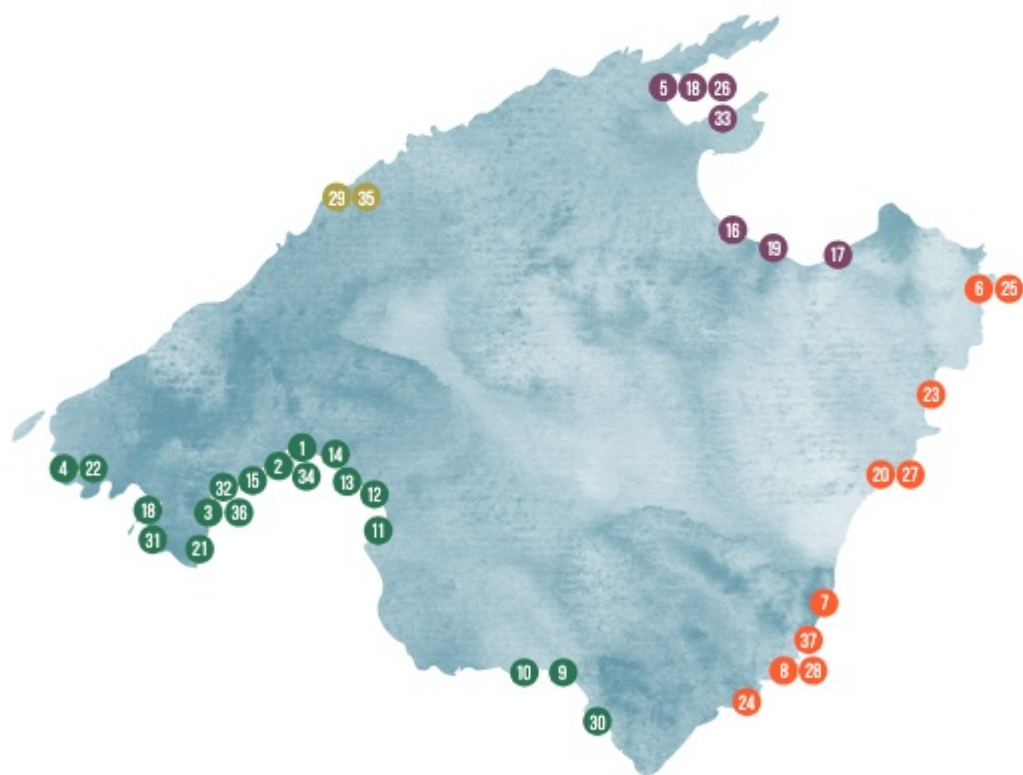

There are also has a lot of boat rental companies and schools that teach sailing, windsurfing, paddle boarding, fishing and other water activities.

Mallorca's maritime industry stands out for the capacity of its facilities and skill of its workers. These companies offer every sea-related service: maintenance of modern and classic boats, painting, accessories, mechanics, sails and upholstery, electricity, electronics, refrigeration, etc. and they have the best facilities and perfectly-equipped boatyards to do so.

## PORTS & MARINAS

Due to its orography and fishing tradition, Mallorca has a multitude of marinas and ports around the island with different capacities in terms of the number and size of boats that can moor in each one.

## SAILING & SPORTS ACTIVITIES

---

Gliding over the sea pushed solely by the wind is an indescribable feeling and one of the main attractions of Mallorca's coastline. The bay of Palma, in the south west of the island, is one of the most famous regatta locations in Europe and the bays of Alcudia and Pollença in the north are ideal for all types of water activities: sailing dinghies and catamarans, windsurfing, kitesurfing... But there is much more on offer for sea lovers: paddle boarding, kayaking, rowing, open water swimming, snorkelling, scuba diving... And thanks to the schools, clubs, instructors, organised trips and boat rental companies, you can try all types of water sports at every level, from beginner to elite.

## DIVING

Mallorca is a true paradise for underwater activities as it offers everything needed for a memorable dive: crystal clear waters with excellent visibility, sheltered places with calm water, the perfect water temperature and exceptional flora and fauna, with marine reserves that offer all the beauty of life and complete silence.
